Fine Brood Mares for Virginia by Samuel Walton and the Floyd Brothers.

John Minor Botts Lewis, of Lynchburg, one of the best known of virginia archi-tects and consulting engineers, also a breeder of thoroughbreds, and a well teets and consulting engineers, also a breeder of thoroughbreds, and a well informed student of blood lines, has recently purchased of James R. Keene, of the famous Castleton Stud, Lexington, Ky., the bay horse Glenwood, foaled 1883, by St. Legnards, dam imp Glen Fairy, by Forager. Glenwood figures as a winner of many races, having been placed in fifty-five starts and holding the truck record at Hot Springs, Ark., for one and one-eighth miles in 1:55, and at Highland Park for one and three-sixteenth miles in 23-4. During his turf career the son of St. Leonards beat such horses as Robert Waddell, winner, of the \$50,000 American Derby, Advance Guard, Reckoner, Marshall Ney, imp. Miss Melton, and a number of others.

Mr. Lewis is a relative of the former well known Virginia gentlemen, and breeder of thoroughbreds, the Hon. John Minor Botts, who bred the great racehorse and sire Revenue, his half-brothers. CONTAGIOUS BLOOD POISON NO LIMIT TO ITS POWERS FOR EVIL

Contagious Blood Poison has brought more suffering, in ry and humila tion into the world than all other diseases combined; there is hardly any limit to its powers for evil. It is the blackest and viest of all disorders, wrecking the lives of those unfortunate enough to contract it and often being wrecking the lives of those unfortunate enough to contract it and often being transmitted to innocent offspring, a blighting legacy of suffering and shame. So highly contagious is the trouble that innocent persons may contract it by using the same table ware, toilet articles or clothing of one in whose blood the treacherous virus has taken root. Not only is it a powerful poison but a very deceptive one. Only those who have learned by bitter experience know by the little sore or ulcer, which usually makes its appearance first, of the suffering which is to follow. It comes in the form of ulcerated mouth and throat, unsightly copper colored spots, swollen glands in the groin, falling hair, offensive sores and ulcers on the body, and in severe cases the finger nails drop off, the bones become diseased, the nervous system is shattered and the sufferer becomes an object of pity to his fellow man. Especies tered and the sufferer becomes an object of pity to his fellow man. Especially is the treacherous nature of Contagious Blood Poison, shown when the infected person endeavors to combat the poison with mercury and potash. These minerals will drive away all outward symptoms of the troubles for a while, and the victim is deceived into the belief that he is cured. When, however the treatment is left off he finds that the poison has only been driven deeper into the blood and the disease reappears, and usually in worse form because these strong minerals have not only failed to remove the virus from the blood but have weakened the entire system because of their destructive action. S.S.S. is she only real and certain cure for Contagious Blood Poison. It is made of a combination of healing blood-purifying roots, herbs and barks, the best in Nature's great laboratory of forest and field. We

BROAD ROCK. Oakham, in Rutlandshire. Every peer of pected to deliver a shoe from the foot of one of his horses or to pay a fine in default. The fine usually takes the form of an ornamental horseshoe, often surmounted by the coronet of the peer presenting it. The total number of shoes at present in possession of the local authorities is 300, and among them the most valued are those presented by Queen Elizabeth, King George IV., Queen Victoria and Queen Alexandra, who passed through the town some years ago when Princess of Wales. Additions to the collection have recently been made by Lord Denman and the Earl of Ilchester. Many of the shoes hang in the hall of the castle, which is now used as a shire hall. The building is said to be the finest example of an isolated Norman hall to be found in England.—London Graphic.
